

Dear new member of the Plant Biology community

Welcome to the Plant Biology department at Michigan State University, when we say “Go Green,” we mean ALL things green!

Plant Biology (PLB) is one of many departments at MSU involving plant science. Our faculty, staff, and students work to understand everything about how plants work and the important roles that they play in our lives. PLB is unique among departments in its broad scope—“*from molecules to ecosystems*”—and its emphasis on research that produces foundational knowledge about plants as organisms. We value diversity in scientific approach, lived experience, perspective, identity, and ability, and look forward to learning from you!

Learn more about our programs, activities, and accomplishments [here](#).

Whether you are joining the department to learn, to teach, contribute to research and outreach, or all of the above—we welcome you to this plant-loving community of scientists, educators, scholars, and students. We hope your time here is productive and enjoyable.

A handwritten signature in blue ink that reads "Andrea Case". The signature is written in a cursive style with a long, sweeping underline that extends to the right.

Andrea Case
Chair of the Department of Plant Biology
